Yes, the community has confirmed they have the funds. What we are working with them to achieve is find out if there are any third party groups that can assist them in providing other matching dollars. Christina, I will be submitting a request for reimbursement before August 15.

Haven,

So what you are telling me is the matching funds have been confirmed, and you are just reminding them of their commitment at this point?

Christine,
 In the requests the communities all stated that they would be able to get the matching funds required for each project. What we are doing now is working with the communities to make sure they have these funds before we start expending funds. For example, the Community (City, Tribe, and Native Corp) of Gambell, has agreed to provide the funds needed, but they are also working with external organizations to see if they can procure other funds. That is what I was trying to express in my report.

According to your last progress report on Denali Commission funds:

"I am waiting to hear from communities about their abilities to provide the matching funds that they stated were available."

7/29/2008

The powers that be at the Denali Commission were under the impression these matching funds were secured (i.e., the communities had already set these funds aside to be used for this project) prior to you being approved for these grant funds. Can you please provide some clarification on this issue?

Thank You!

Christine,
What problems do we still have, is NSHC/me causing you grief??? Sorry if I am. When does the Denali Commission money have to spent? I have some bills that I can put towards those funds right now if it would be appropriate.
