Issue: Distressed Community Criteria 2011 Update

Date: June 2011

Background:

This 2011 annual update of the distressed community list prepared by the Alaska Department of Labor and Workforce Development (DOL&WD), Research and Analysis Section, uses the most current population, employment and earnings data available to identify those Alaska communities considered “distressed”. The distressed status is determined by comparing average income of a community to full-time minimum wage earnings, the percentage of the population earning greater than full-time minimum wage earnings and a measure of the percentage of the population engaged in year-round wage and salary employment.

More Community Data Available

This report uses enhanced physical place of residence information to better identify the community of residence for Permanent Fund Dividend applicants age 16 and over. Communities included in this report are closely aligned with those used in the annual population place estimates prepared by the Alaska Department of Labor and Workforce Development.

Attached is a list of Alaska communities with employment and earnings information used to determine their distressed community status for 2011. Maps by economic region that show locations of communities that meet the distressed criteria are also included.

Surrogate Standard Background

The Denali Commission adopted alternate methods of determining community eligibility when census data were not available for the 2000 update. That “surrogate” standard considered additional data and methodology. For this 2011 update, we compiled the data required to implement a “surrogate” standard to determine eligibility.

Data Sources and Methodology

Three sources of data are used for the 2011 update:

- 2010 Permanent Fund Dividend applications (PFD). This information includes the applicant’s age, social security number (SSN), and physical place of residence.

- Alaska unemployment insurance wage records for calendar year 2010. This information includes wage and salary worker earnings from all private, state and local government employers. Federal government, military, and self-employed earnings are not available and not included in the earnings estimate.
- Calendar year 2009 Commercial Fisheries Entry Commissions (CFEC) total fish value data by community, the most recent data available.

All 2010 PFD applicants age 16 and over in 2010 were assigned to an Alaska borough/census area and community by place of residence. PFD applicants age 16 and over were matched with wage and employment information by SSN. CFEC 2009 total fish values were added to wage and salary earnings to compute community average market income.

2011 Update Surrogate Standard

A community that meets two of the following three surrogate standard criteria is considered distressed:

Criteria 1 Average market income in 2010 is less than \$16,120.

$$\text{Average market income} = \frac{\text{Community UI Earnings} + \text{Community CFEC Earnings}}{\text{Number Residents 16 and Over}}$$

$$\$16,120 = \text{Minimum Wage } (\$7.75/\text{hour} \times 1,120 \text{ hours/year})$$

Any community with an average market income of less than \$16,120 in 2010 meets this criteria.

Criteria 2 More than 70% of residents 16 and over earned less than \$16,120 in 2009.

$$\text{Percent Residents w/Earnings} < \text{than } \$16,120 = 100 \times \frac{\text{Number Residents w/Earnings} < \text{than } \$16,120}{\text{Number Residents 16 and Over}}$$

Any community with more than 70% of its residents earning less than \$16,120 in 2010 meets this criteria.

Criteria 3 Less than 30% of residents 16 and over worked all four quarters of 2010.

$$\text{Percent Residents Employed All 4 Quarters} = 100 \times \frac{\text{Number Residents Employed All 4 Quarters}}{\text{Number Residents 16 and Over}}$$

Any community with less than 30% of its residents employed all four quarters of 2010 meets this criteria.

Appeals

The Denali Commission recognizes that in some cases the data collection and application methodology does not accurately reflect the appropriate classification

of some communities. Therefore, the Commission is open to reviewing a community's classification as "non-distressed." Any community that believes a "non-distressed" classification was determined in error may appeal to the Denali Commission. Appeals determinations will be made in lieu of new information (relevant economic data and facts) which demonstrate the data compiled by the DOL&WD was erroneous, invalid, or outdated. Additionally, the Commission will take into consideration the past economic status of a community as determined by the Denali Commission's annual Distressed Community Criteria lists dating back to 2002. Past economic statuses will not, however, be the single determining factor for successful appeals. They will be considered in addition to the new information provided. New information must come from a verifiable source and be robust and representative of the entire community and/or population.

In addition to demonstrating the data compiled by the DOL&WD was erroneous, invalid, or outdated, the new information must demonstrate a community does meet at least two of the three Surrogate Standard criteria as defined above for classification as a distressed community.

Appeals must be sent in writing to the attention of the Denali Commission Director of Programs who will make an appeal determination based on the new verifiable information presented and will provide a response in writing within 30 days.

Send appeals to:
