

The first and still the best . . . Portable Collapsible Tank

It was more than 50 years ago that the first Fol-Da-Tank was introduced to firefighters, who recognized its value and quality immediately. Fol-Da-Tank Co. has been continually improving frame and fabric designs to help provide the most reliable portable water tank in the industry.

Fol-Da-Tank has proved to be the practical answer as an extra water supply for rural areas, where water pressure is low or as a back-up facility for municipal fire departments. It's available in nine standard sizes.

Fol-Da-Tank doubles the fire-fighting ability of a tanker truck at an affordable price.

Construction Features

- Liners – Hypalon, Vinyl, FDA, Chemical Resistant, Canvas
- Frames – Steel – Resistance welded 14-gauge 7/8" round steel tubing with snag free finish
Aluminum – 1" square x 1/8" wall Aluminum with snag free finish
- Hinges – Die-cut
Grommets – Solid Brass
Bolts – Heavy duty
- The original double folding tank available

■ Double fold frames available on all frame sizes

Two men can unload a Fol-Da-Tank from the truck and set it up in less than 30 seconds.

While the pumper empties the Fol-Da-Tank, a tanker can be bringing more water.

With the fire out, Fol-Da-Tank can be emptied quickly with the exclusive 10" dia. drain sleeve. You can store the drain sleeve inside or outside of the tank.

Tank Sizes

Steel – 29" High x 7" Width Alum. – 28-5/8" High x 9" Width
(shipping carton is 30" high for both frames)
