813 West Northern Lights Blvd
Anchorage, Alaska 99503-2495

David,

The community of Gustavus was introduced to you, AEA and all the folks you work with several years ago and since that time your team and our team have worked closely in an attempt to improve the infrastructure of Gustavus. As a new newly formed city, we found ourselves with outdated energy generating equipment, no hydro generation capability and a tank farm sorely in need of replacement.

Through the efforts of your team, our community now has a new, state of the art diesel power generation facility which is on line producing steady, efficient and effective electric power.

The citizens of Gustavus want to thank you for your effort, hard work and constant communication that has helped to solve one of our energy problems.

We look forward to continued cooperation with you and your able team in meeting more of our future energy needs.

Sincerely,

Kenneth Klawunder, Mayor
