Negative Determination Response - Concurrence

Dear Mr. McConnell:

The Division of Coastal and Ocean Management (DCOM) has received your consistency determination for the above-referenced activity. You propose to install three 12 inch pipe pilings 60 feet from the banks of the the Kwigillingok River to a depth of 30 to 40 feet for the Kwigillingok IRA Council. You also propose to install seven 12 inch pipe pilings at three locations 60 feet from the banks of the Kinak River. The purpose of the mooring points is to provide safe moorage for barges that does not currently exist.

You have determined that your proposed activity will have no effects on the Alaska Coastal Zone. DCOM has consulted with State resource agencies and the affected coastal district(s), and concurs with your negative determination.

This State consistency response, developed under 11 AAC 110, applies to the federal consistency determination required for your activity per 15 CFR 930 Subpart C. This consistency response is only for your activity as you described it in your consistency determination. If you propose any changes to your activity, federal regulations require that you contact this office to determine if further review and approval is necessary.

By copy of this letter, I am informing State resource agencies and the coastal district(s) of DCOM's concurrence with your determination. If you have any questions regarding this process, please contact me at 907-269-7480 or email Melinda.ODonnell@alaska.gov.

Sincerely,

Melinda O'Donnell
Project Review Coordinator
